1.A. **Grant of License** DS SolidWorks grants to you a nonexclusive, nontransferable license to use the Software and the printed and/or electronic user documentation (the "Documentation") accompanying the Software in accordance with this Agreement. If you have paid the license fee for a single-user license, this Agreement permits you to install and use one (1) copy of the Software on any single computer at any time (i.e., if you change computers, you must de-install the Software from the old computer before installing it on the new computer) in the country in which you have your principal place of business or, if one of your branches has purchased the license from your reseller, in which this branch is located, *always provided that you have purchased the license from a DS SolidWorks reseller located in the country in which it will be used.* This license may not be transferred to another country. If you have a network license version of the Software (an "SNL"), then at any time you may have as many copies of the Software in use in the country in which it is licensed as you have licenses (see Section 1.A.b below). The Software is "in use" on a computer when it is loaded into the temporary memory (i.e. RAM) or when a user is logged in. If the number of computers on which the Software is installed or the potential number of users of the Software exceeds the number of licenses you have purchased, then you must have an SNL version of the Software installed to assure that the number of concurrent users of the Software does not exceed the number of licenses purchased. License suites consisting of bundles of separate modules (such as SolidWorks® Professional) cannot float separately from each other (for example, where there is one SolidWorks Professional license, Toolbox cannot be floated to one computer while PhotoWorks is floated to a different computer). At the time of registration (see Article 9 below), you must inform us of the maximum number of potential users of the licenses you purchase. We recommend you also inform us of the names of all potential users so that we can notify them of upcoming updates and other pertinent information. If the Software is permanently installed on the hard disk or other storage device of a computer (other than a network server) and one person uses that computer more than
